

Find me if you can...

You are in the tiger census team. Follow the trail, which takes you through 5 habitats in 5 days.

Rules

Each habitat sector has 'spot points' with clues for you. Do the clues point to the presence of tigers? If you think it does, enter 'Yes' in the score sheet given below. If not, enter 'No.'

You can earn **bonus points** at the end of the game. But only if you keep your eyes open for all activities that might be unsuitable for tigers!

Calculate your points by consulting the scorecard.

Earn bonus!

You will double your score if you can choose the best habitat for the tiger. But choose carefully because if you choose the wrong habitat you will lose points from what you have scored.

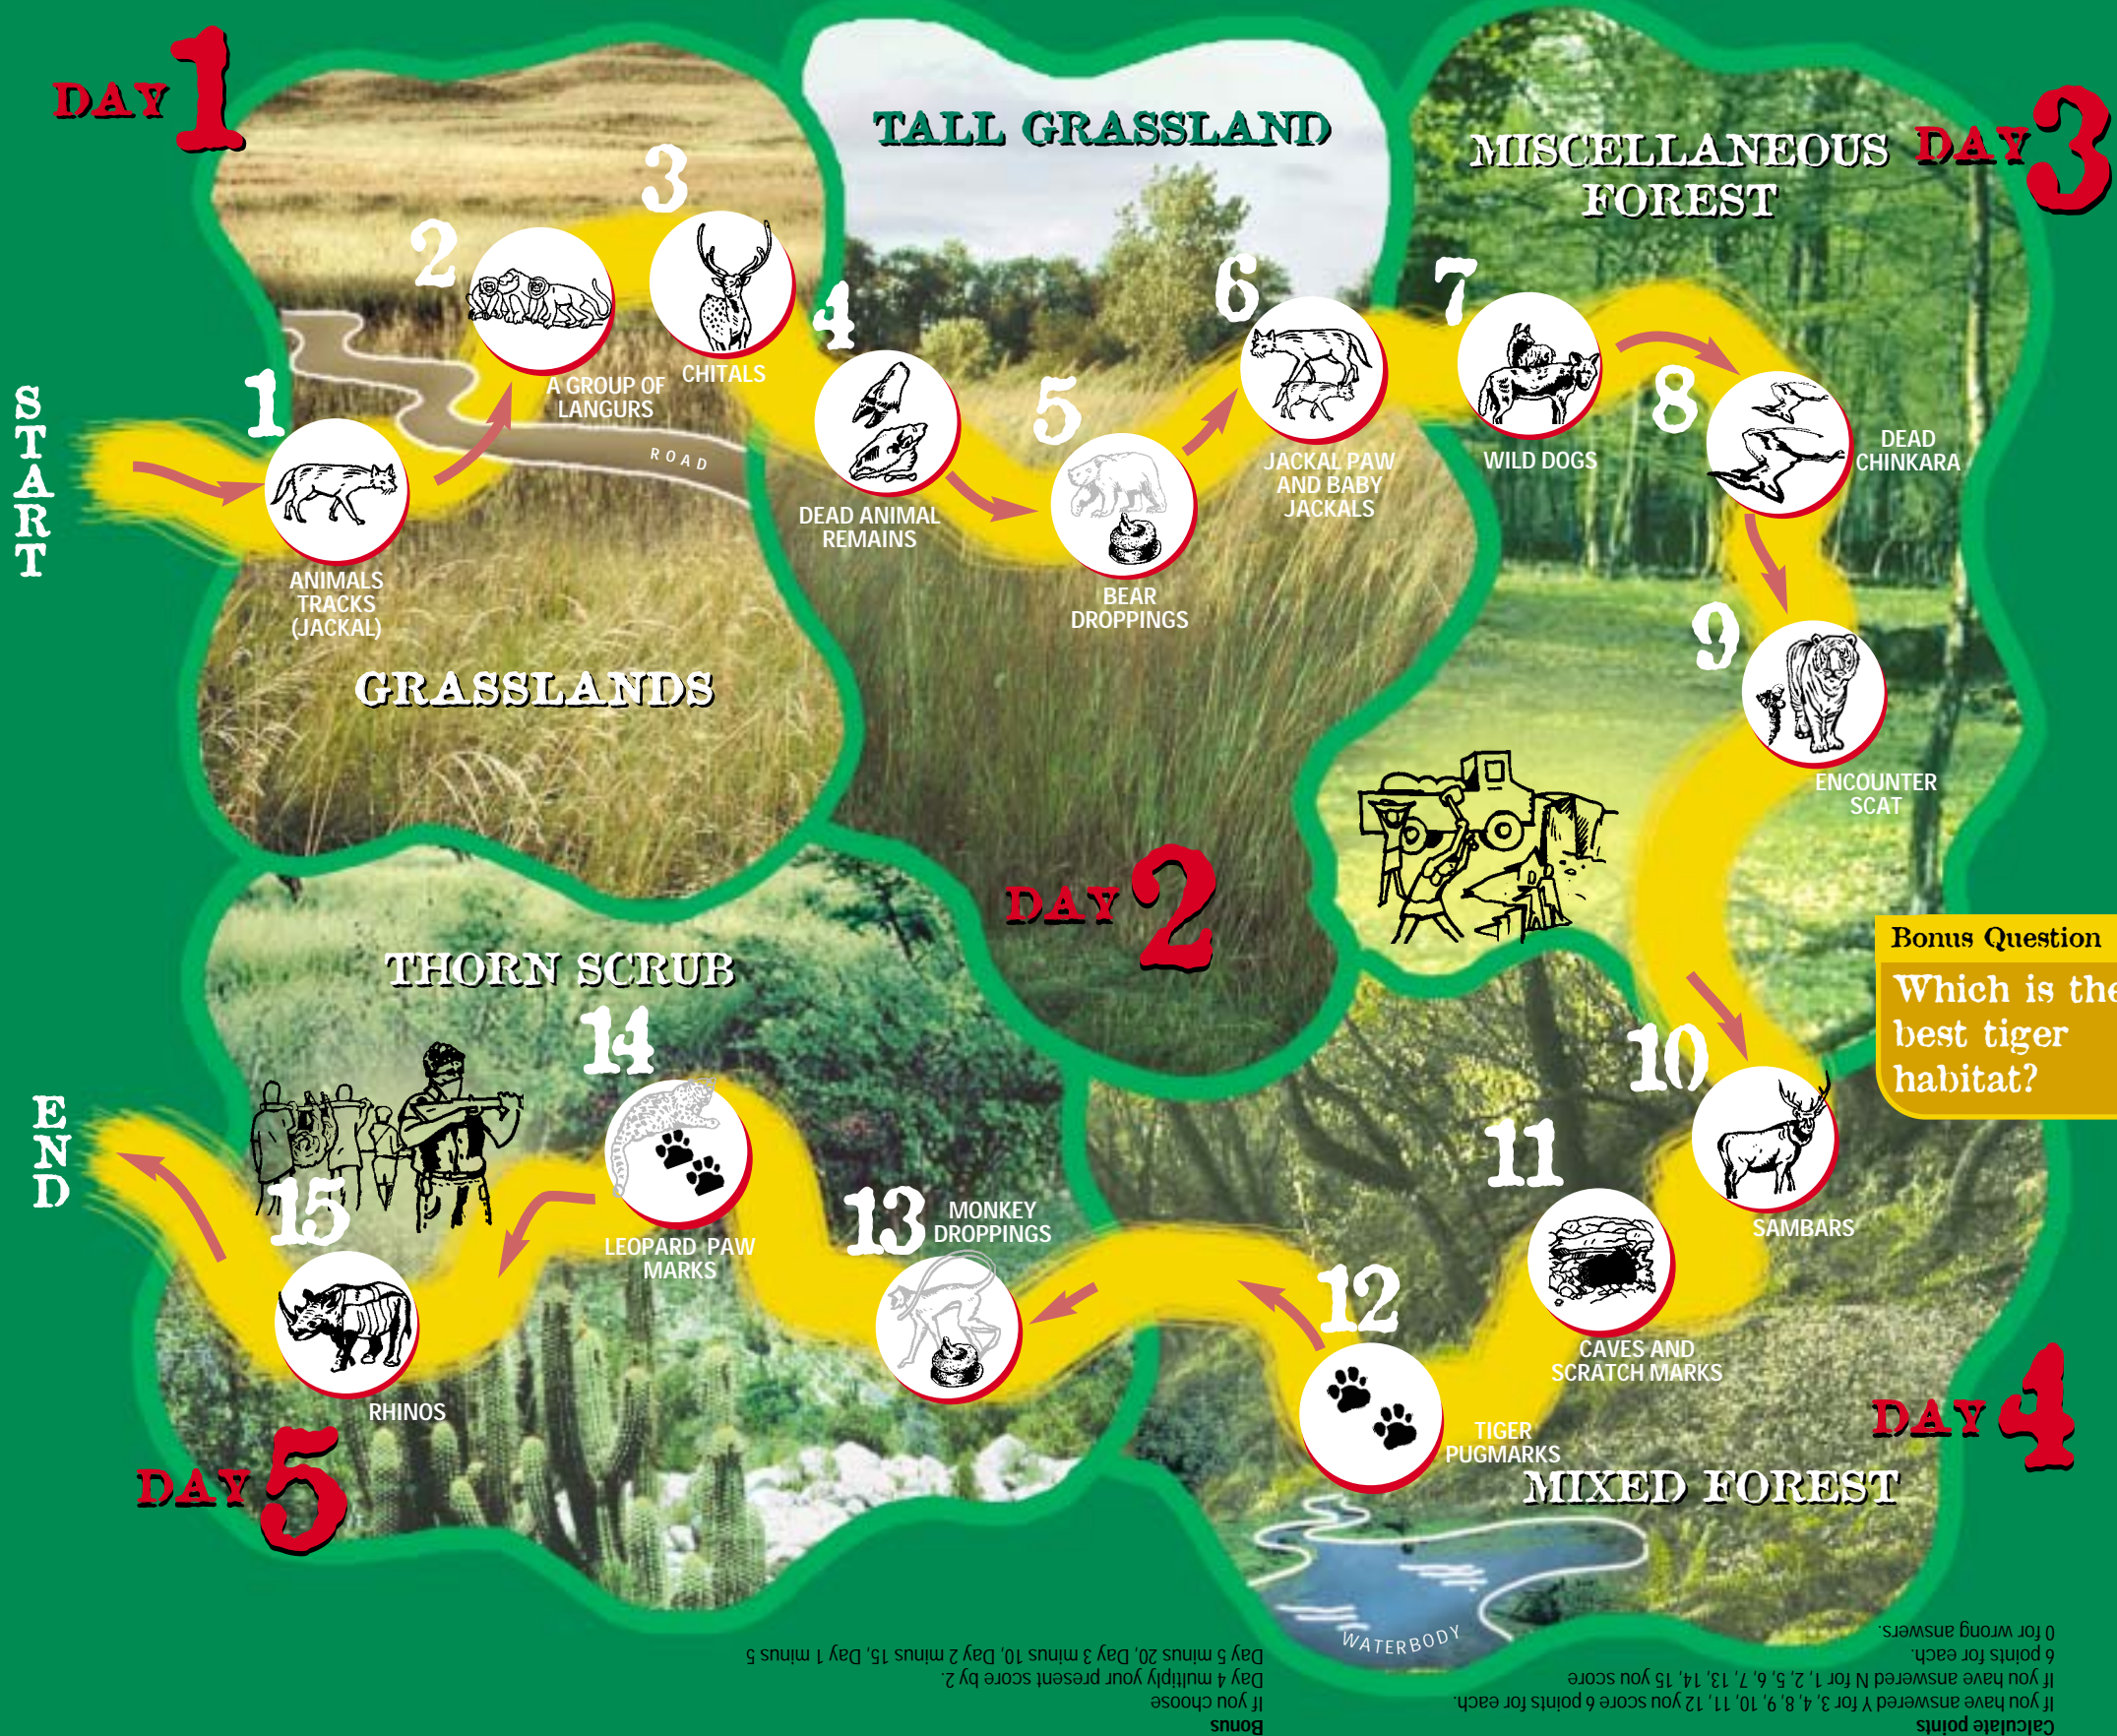

Field Guide Tips

Professional trackers have a field guide and given below are the points they keep in mind while tracking tigers.

- Tigers like shady and cool places and love water.
- They need a healthy number of hoofed animals to survive. They are always close to their prey.
- Tiger droppings (scat) and dropping of other animals are often used to track them.
- Tigers stay away from disturbances – roads, mining and other human activities.
