

Where will all the people go?

Environmental Refugees are forced out of their homes by both natural disasters and man-made developments. With millions of people from around the world being displaced and the count increasing every year, will the world ever have enough room for them?

NATURAL DISPLACEMENTS
 Earthquakes, floods, draughts, hurricanes, tsunamis, landslides, tornadoes, cyclones, volcanoes

MAN-MADE DISPLACEMENTS
 Dams, roads, airports, water schemes, mining, urban development, forestry
